Professional Summary

Second-year undergraduate student in Artificial Intelligence & Data Science with a strong foundation in programming and data analysis. Skilled in Python, C, C++, HTML, CSS, JavaScript, and Power BI, with hands-on experience in building practical projects. Passionate about leveraging technology to solve real-world problems and continuously learning new tools in AI and Data Science.

Technical Skills

Programming: Python, C, C++, R

Python Libraries: NumPy, Pandas, Matplotlib

Web Technologies: HTML, CSS, JavaScript

Data Analytics & Visualization: Power BI, Basic Data Analysis

Tools: Jupyter Notebook, VS Code, Git, GitHub

Core Areas: Artificial Intelligence & Data Science Fundamentals, Problem Solving, Data Handling

Other: Basic Statistics, Logical Thinking, Analytical Skills

Education

B.Tech in Artificial Intelligence & Data Science 2024 – 2028
Sant Gadge Baba Amravati University, Amravati / P.R. Pote Patil College of Engineering & Management, Amravati
CGPA: 9.33 / 10

Class XII (HSC) 2024
Maharashtra State Board, Percentage: 75%

Class X (SSC) 2022
Maharashtra State Board, Percentage: 84.60%

Projects

Major Projects

Smart Student Assistant (AI-Based Web Application)

- Developed a web-based assistant to identify student stress and workload using rule-based logic.
- Built backend using Flask and designed frontend using HTML and CSS.
- Provided task organization suggestions based on predefined conditions.

Smart Grievance Redressal System (Hackathon Project – NagarNiti)

- Designed a civic-tech solution during a 24-hour hackathon to simplify complaint registration and tracking.
- Created structured workflows to route complaints using rule-based processing.

WhatsApp-Based Grievance Management Interface (Prototype)

- Developed a chatbot-style interface to collect and manage complaints.
- Implemented automated responses using backend logic.

Minor Projects
Fake News Headline Generator (Python Project)

- Built a console-based application generating dynamic headlines using templates.

Password Guessing Game (Python Project)

- Implemented difficulty levels, hints, and attempt tracking using core Python.

Phonebook Management System (Core Python)

- Created a CRUD-based phonebook application using dictionaries and functions.

Virtual Internships & Training

AICTE – EduSkills Virtual Internship Programs 2024–2025

- Completed training in Cloud, Networking, and Full-Stack Development concepts.

Deloitte Data Analytics Job Simulation

- Practiced real-world data analysis and interpretation workflows.

Certifications

- NPTEL – Enhancing Soft Skills and Personality (Silver Medal)
- NPTEL – Python for Data Science (Elite Certification)
- Google Developer Group (GDG) – Participation Certificate

Positions of Responsibility

Report Writer – Forum of Artificial Intelligence Developers (FAID) 2025–2026

- Documented technical events and supported AI-related initiatives.

Achievements

- Participated in the 24-Hour National Level Hackathon at Sipna College of Engineering & Technology, Amravati.
- Served as Class Representative during first year (two semesters).
